

ULL

High-Performance Dry Lubricant

DESCRIPTION

ULL is a long-term, high performance dry lubricant with anti-static properties thus helps to prevent dust build up. It is suitable for regular use on mechanical assemblies for lubricating sprocket wheels, ball races, gears and axles, for example. It may also be used for cleaning and lubricating gold contacts on edge connectors and for cleaning and protecting relays, particularly from silicone contamination. After evaporation of solvent, **ULL** is nonflammable and can be used over an extremely wide operating temperature range.

APPLICATION GUIDELINES

Disconnect all apparatus from the power supply. Spray ULL on the area to be cleaned and lubricated. If heavy dust deposits are evident, spray with an air duster, such as our EAD, prior to treating with ULL. Ensure that all the solvent has evaporated before reconnecting to the power supply. Test suitability when using on any sensitive plastics.

TYPICAL PRODUCT APPLICATION

ULL is suitable for use on mechanical assemblies in regular use for lubricating sprocket wheels, ball races, gears and axles, for example. It may also be used for cleaning and lubricating gold contacts on edge connectors and for cleaning and protecting relays, particularly from silicone contamination.
